

Business Risk Services

A dynamic alternative to bring value to your business

A changing environment

At Grant Thornton our goal is to deliver genuinely workable solutions that truly fit clients businesses and deliver tangible value.

Companies today face significant commercial and operational challenges and have responsibilities to an increasing number of stakeholders. In recent years we have seen the board and managements' expectations of its risk assurance functions increase dramatically. Companies across the industry spectrum are facing more and more regulatory and compliance obligations and the nature and range of internal audit activity is evolving at pace, pushing the function to align itself with the strategic goals of the business and to deliver real and sustainable value.

Our Business Risk Services team deliver practical and pragmatic risk management solutions that support clients in tackling the threats facing their businesses and in turn capitalize on opportunities so as to optimize strategic success and commercial value. Whether this involves co/outsourced internal audit, internal controls, enterprise risk management solutions, fraud prevention programs, the risk management of outsourced activities or the use of technology to manage IT risk to achieve enhanced performance. We offer local knowledge with a global reach to ensure you get the attention you deserve.

Our team bring best practice and industry benchmarking expertise across a wide range of sectors including manufacturing, industrial products, energy, financial services, telecommunications, food and beverage and pharmaceutical. Many of our people have worked within these sectors and can bring their hands-on experience to the table coupled with a seamless professional consulting capability.
