

Increased efficiency and flexibility with RelativityOne

In order to support you even better in dealing with unstructured data, our experts at Grant Thornton now work with the software “RelativityOne” from Relativity GmbH, Frankfurt am Main “Relativity”. With this, we at Grant Thornton are expanding our global offering in the field of forensic services. The cloud-based SaaS product enables us to better support you in multinational litigation, internal investigations and regulatory compliance.

About Relativity

Relativity makes software to help users organize data, discover the truth and act on it. Its SaaS product, RelativityOne, manages large volumes of data and quickly identifies key issues during litigation and internal investigations.

Relativity has more than 300,000 users in approximately 40 countries serving thousands of organizations globally primarily in legal, financial services and government sectors.

Expansion of the forensic offering with Relativity

Grant Thornton is expanding its global forensics offering with Relativity's SaaS product RelativityOne. Our forensic experts have been using Relativity tools to conduct forensic investigations on behalf of clients for several years. With the new RelativityOne tool, we can better assist our clients in multinational litigation cases, internal investigations and regulatory compliance matters. The power of RelativityOne's cloud-based capabilities can ultimately increase a company's efficiency and productivity. The use of RelativityOne as a flexible and extensible cloud product with intuitive user guidance, multiple automation options and built-in artificial intelligence "AI" represents a further innovative addition to Grant Thornton's service portfolio in the Advisory business area.

The securing, processing and sifting of data within the scope of forensics projects requires fast action with correspondingly compatible tools in a secure environment. With RelativityOne, we now have the optimal solution for these requirements and can thus offer our customers worldwide innovative support in the field of forensics.

Our services

Our experts at Grant Thornton specialise in using RelativityOne to provide clients with easy-to-understand dashboards, AI-based document and contract reviews, user-defined analytics and a range of time-saving automation enhancements.

Clients in Switzerland and Liechtenstein can now take advantage of RelativityOne to address new challenges with AI and simplify data management at a time when data continues to accumulate, and global data protection regulations are constantly evolving.

Your advantages

RelativityOne offers the advantage of added scalability, which is especially needed in today's data-centric society. Additionally, with RelativityOne's support, our customers can choose from the Relativity App Hub the solutions that best suit their individual business processes. Finally, the plus points are regular product updates and integration with other cloud products, whereby the data always remains within the desired country. RelativityOne is data protection compliant and meets internationally recognised standards and security certifications in the area of information security. In addition, the tool is ISO 27001 certified and holistically secured through threat intelligence and 24/7 monitoring.

RelativityOne offers our clients an efficient and effective way to move to the cloud, even for highly sensitive eDiscovery matters. This particularly benefits teams in cross-border cases.
